

e-PIC One™ Enterprise

Fully Integrated ERP Software - One System, One Solution

About PIC Business Systems

Since 1987 PIC has helped hundreds of companies throughout the United States and Canada operate more efficiently, integrate disparate process, and improve their bottom line. Our team of knowledgeable Industrial Engineers, Accountants, Computer Scientists, and other industry veterans has the proven ability to identify and prioritize sore spots with the greatest return on investment.

Starting with an in-depth evaluation of your current business operations, we will recommend an implementation path. If we cannot make the business case and present a tangible ROI, we will not recommend a partnership with our firm.

Several of our customers have used our products for over 20 years.

Our Product

e-PIC One™ Enterprise is a web-based, fully integrated business management software solution. Designed to manage every aspect of your business, from order entry, through production, purchasing and accounting, e-PIC One™ Enterprise provides revolutionary features to make your customers, vendors and employees lives easier.

Call today to schedule a demonstration of the solution for Manufacturers, Distributors, Suppliers and Franchises.

| Proven & Tested* |
|---|
